

Jon Brackpool Photography

My intention is not to purely capture an image but to add an artistic input to that image in order to make it something special, something unique and hopefully something pleasing to view both now, and in the future.

Whether you'd like to record your special day, capture those childhood memories for loved ones to enjoy, or would simply like to have a keepsake for yourself, I can help turn that wish into reality.

Thank you for taking the time to look

Jon

"Beauty is in the eye of the photographer"

I offer a wide range of photographic services including portrait, event and wedding photography.

I see images everywhere I look and as such I have not tried to focus on a single field of photography such as landscape or portraiture. Some may say this shows a lack of direction, but to me I believe it reflects my desire to find beauty everywhere I look.

I like to think of my self as a photographic artist "writing with light", developing more from the picture than the image alone. If that is the sort of art that you want or need then please get in touch and I can help you find your 'special picture'.

This pricelist contains details of the portraiture service I offer. As with all the work I do, the format and product offerings are flexible. I will be more than happy to come and discuss what it is you are looking for and tailor a package specifically to meet your individual needs.
